MOBILE.OLD

AAL — AMBIENT ASSISTED LIVING

OUTDOOR SERVICES ENHANCING THE MOBILITY OF OLDER ADULTS

BACKGROUND

The **MOBILE.OLD** project aims to support the mobility of seniors. It consists of a set of services, presented as an **Android** application. These services are extremely easy to handle and can be used as cross device applications on **Smartphones**, **Tablets** and **Smart-TVs**. They can be applied in an integrated manner, making it possible to support seniors in different situations when preparing for a trip or on the road.
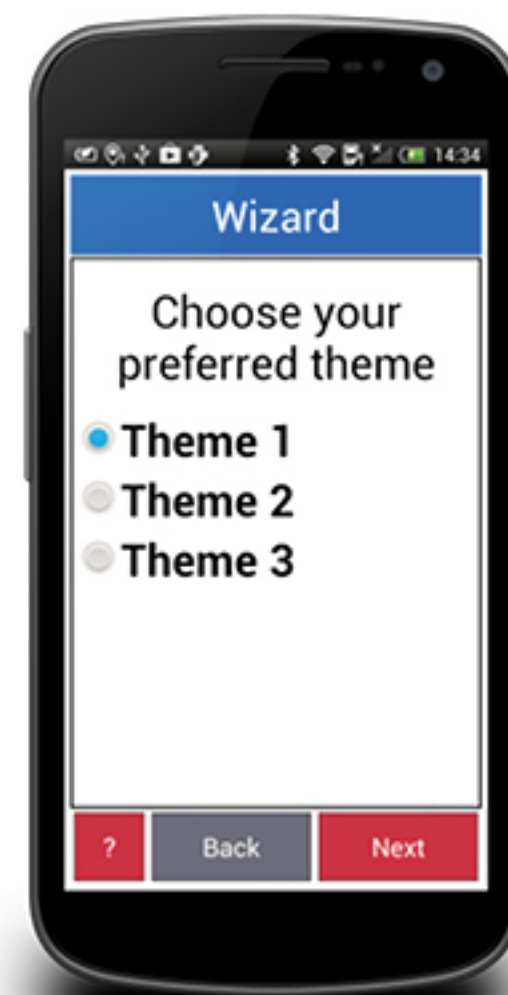

MULTIPLE DEVICE ACCESS

FEATURES

The MOBILE.OLD Apps feature:
- personalized interfaces
- common look & feel throughout all devices
- single sign-on, one login for all applications
- adaptation wizard (text size, volume, theme, …)
- low information density
- online synchronisation throughout all devices
- text to speech funcionality
- variety of high contrast color schemes
- verified quality content
- full control via keyboard & mouse

Wizard — Choose your preferred theme
- ● Theme 1
- ○ Theme 2
- ○ Theme 3
